Education

Kalinga Institute of Industrial Technology

Bachelor of Technology in Computer Science; CGPA: 9.62/10.00

Jul 2023 – Jun 2027

Bhubaneswar, Odisha

Technical Skills

Languages: C, C++, Java, Python, JavaScript, TypeScript, HTML/CSS, SQL

Frameworks & Technologies: React.js, Node.js, Express.js, FastAPI, MongoDB, PostgreSQL, MySQL, Redis, TailwindCSS, Docker

Cloud & Tools: AWS, Google Cloud Platform, Git, Linux

Projects

CP Roadmap Generator | *FastAPI, React.js, PostgreSQL, Machine Learning, Docker* 🔗 [Live Link](#) Feb 2026

- Built an ML-powered competitive programming platform using FastAPI and React.js, generating personalized roadmaps via temporal skill profiling, Ebbinghaus forgetting curves, and GNN prerequisite analysis for 1,000+ users.
- Designed a neural reranker with simulated annealing and Thompson Sampling optimization, improving practice efficiency by 40% through intelligent problem selection.
- Containerized the application with Docker and deployed via GitHub CI/CD on Render, integrating LeetCode and Codeforces APIs with PostgreSQL and Redis caching for low-latency data retrieval.

Fake News Classification System | *Python, Streamlit, Scikit-learn, TF-IDF* 🔗 [Live Link](#) Oct 2025

- Engineered a fake news detection application using TF-IDF (20K features) with Logistic Regression and Linear SVM, built on a modular pipeline covering preprocessing, stratified splitting, and benchmarking.
- Designed an interactive Streamlit dashboard supporting dataset uploads, configurable training, batch predictions, and downloadable performance reports in CSV and JSON formats.

Travel Itinerary Platform | *React.js, Node.js, Express.js, TypeScript, MongoDB* 🔗 [Live Link](#) May 2025

- Developed a secure MERN-stack application with JWT authentication, role-based access control, and RESTful APIs; optimized MongoDB schemas to reduce query latency by 35% and built a responsive, SEO-optimized React.js front end using the Context API.

AI Code Generator (PythOwO) | *React.js, Node.js, Express.js, Groq API* 🔗 [Live Link](#) Feb 2025

- Built a React.js and Node.js application that converts natural language prompts into Python code with live syntax highlighting; reduced front-end load times by 40% via code-splitting and lazy loading.
- Integrated the Groq SDK for AI inference, achieving sub-second code generation response times.

Relevant Coursework

- | | | | |
|---------------------|-----------------------|---------------------------|-------------------------|
| • Data Structures | • Algorithm Analysis | • Artificial Intelligence | • Computer Networks |
| • Operating Systems | • Database Management | • OOP | • Computer Architecture |

Certifications

AI-ML Virtual Internship

Jan 2025 – Mar 2025

Google for Developers & AICTE EduSkills

- Trained neural networks with TensorFlow/Keras (92% image classification accuracy); built on-device object detection pipelines with ML Kit and TensorFlow Lite, improving inference speed by 35%.

AWS Academy Cloud Foundations

Dec 2024 – Apr 2025

Amazon Web Services (AWS)

- Mastered core AWS services (EC2, Lambda, S3, IAM, VPC) and applied the Well-Architected Framework for cost-effective, reliable cloud deployments.

Achievements

- Finalist at AISOC Hackathon (Chronos v1.0): led full-stack development of an AI-powered application, designing scalable REST APIs and delivering an end-to-end user experience under time constraints.
- Attained 3-star ratings on CodeChef (1638), LeetCode (1758), and Codeforces (1207); solved 1,000+ problems across major competitive programming platforms, demonstrating strong algorithmic proficiency.
- Maintained a 9.62/10.00 CGPA across five semesters of B.Tech., demonstrating consistent academic excellence.
